EDUCATION

University of Guelph %

Sep 2019 - May 2024

Bachelor of Computing - Computer Science | GPA: 4.0/4.0 (93%)

Guelph, ON, Canada

TECHNICAL SKILLS

**Programming Languages:** TypeScript, JavaScript, Java, Python, SQL, C, Groovy

React, Redux, GraphQL, Vue.JS, HTML, CSS, Sass, Express.JS Web Technologies:

Testing and Automation: Jest, Selenium, Cypress, Mocha, JUnit, Docker, Github Actions, Jenkins

Tools and Infrastructure: AWS, MySQL, PostgreSQL, Git, Node.JS, Linux, Jira

Work Experience

Wave Financial %

May 2023 - Aug 2023

Toronto, ON, Canada

Software Developer (Full-stack)

- Contributed to the development of a microservice oriented financial services platform that is used by over 325,000 businesses monthly through the use of React, Redux, TypeScript, Jest, Python, Django and GraphQL.
- Drove a significant increase in monthly revenue through the complete overhaul of Wave Checkouts, a legacy feature which allows customers to pay for products or services without the requirement of individual invoices.
- Identified Cypress E2E test deficiencies and created tickets that were addressed by various members of the team.

Vidyard %

Software Developer (Frontend)

Jan 2023 - Apr 2023 Kitchener, ON, Canada

- ullet Developed the frontend and CI/CD of a microservice oriented video platform that is used by over 160,000businesses and 600,000 individuals by using React, Redux, TypeScript, Sass, AWS, and GitHub Actions.
- Architected and created a library written in **TypeScript** which is usable across multiple Vidyard applications for video background virtualization through the leveraging of **TensorFlow**-based body segmentation.
- Ensured that the library's code maintained a high standard of quality through the addition of **Jest** unit tests, **ESLint** linting, and **GitHub Actions** CI/CD integrations.
- Wrote extensive documentation on Confluence regarding project risks, decisions made, code examples, and more.

CloudOps %

May 2022 - Dec 2022

Software Developer (Full-stack)

Montreal, QC, Canada

- Full-stack development of a web and API based application using Java, Groovy, Vue.JS, JavaScript, MySQL, and Jest that allows users to manage private and public cloud resources from AWS, GCP, Azure and more.
- Leveraged the AWS Java SDK to allow users to manage AWS EKS Kubernetes clusters through the app.
- Enhanced the performance of several AWS SDK components by over 300% through the use of Redis caching.
- Ensured high software quality and code coverage of over 90% through the performance of code reviews, PR reviews, acceptance reviews, and the usage of Groovy backend and Jest frontend unit tests.

NCR Corporation %

Software Developer (Frontend)

Sep 2021 - Dec 2021

Waterloo, ON, Canada

- Improved an online banking application with over 3,000,000 monthly active users by leveraging React, Redux, **TypeScript**, and **Jest** as a member of the money movement team.
- Upgraded the application's Zelle payment API implementation to meet Zelle's new technical design specifications.

Nymion Solutions &

Apr 2021 - Aug 2021

Software Developer (Full-stack)

Montreal, QC, Canada

- Created an optical data recognition and collection application with Java, Node.JS, JavaScript, HTML, and CSS that flagged sensitive information from PDFs, images, and spreadsheets with a detection rate of over 95%.
- Leveraged **Docker** and **AWS EC2** to achieve a robust and secure deployment strategy for the application.

## Personal Projects

Auto Mega 🗞

Jun 2022 - Aug 2022

Created a full-stack web application with Java, Spring Boot, React, Redux, TypeScript, Docker, and MySQL that allows users to search for, and view vehicle ads from Autotrader, Kijiji, and Carpages through a centralized hub.

WeMorabilia 🗞

Apr 2022 - May 2022

Utilized React, Redux, TypeScript, GraphQL, and AWS, to create a serverless photo scrap booking website.
